Data Sources & Methodology

SECTION 01

Critical Methodology Warning

Understanding what ANALIZA data actually represents

⚠️ **CRITICAL:** ANALIZA Column E ("Przychody") is **NOT** therapy revenue — it is 80-95% tax payments (ZUS, PIT-4R, PIT-36L). Using ANALIZA "Przychody" as revenue would lead to catastrophic strategic errors. True revenue comes from bank statements only.

WHAT EACH ANALIZA COLUMN ACTUALLY TRACKS

COLUMN	CONTAINS	COMMON MISCONCEPTION	REALITY
Column A	Period / Date	—	Reporting month
Column B	Invoice/Operating Costs	All business costs	Office supplies, utilities, professional services
Column C	Employee Costs	Full labor cost	UoP contracts (employer-paid); B2B contractors excluded
Column D	Tax Payments (ZUS)	—	Social insurance contributions
Column E	"Przychody"	Revenue from therapy	**80-95% tax payments, NOT revenue**

✅ **Correct Data Sources:** Bank statements are the ONLY reliable source for true revenue and cash flow analysis. ANALIZA is valuable for cost breakdowns and tax planning — not for revenue measurement.

VALIDATED 2025 FINANCIALS (BANK STATEMENTS)

2,409,461

SECTION 02

Invoice Costs (Column B)

Operating expenses by year · Monthly breakdown · Trends

329,244
2025 INVOICE COSTS (PLN)
Operating expenses

-17%
VS 2023
Cost optimization

601,558
TOTAL OPERATING COSTS (2025)
25% of true revenue

INVOICE COSTS BY YEAR

2023	398,782 PLN
2024	327,695 PLN
2025	329,244 PLN
2026 Q1	143,444 PLN

KEY COST CATEGORIES IN COLUMN B

CATEGORY	2023	2024	2025	TREND
Office Supplies & Materials	~45K	~38K	~42K	**Stable**
Professional Services	~85K	~72K	~68K	**Decreasing**
Marketing & Advertising	~95K	~78K	~82K	**Stable**
Software & Subscriptions	~42K	~48K	~56K	**Growing**
Facilities & Utilities	~78K	~62K	~58K	**Optimized**
Other Operating	~54K	~30K	~23K	**Reduced**

Insight: Invoice costs decreased significantly from 2023 to 2024-2025, indicating successful cost optimization. 2026 Q1 is tracking higher but includes additional software investments (Booknetic, analytics tools).

SECTION 03

Employee Costs (Column C)

Payroll trends · UoP vs B2B structural shift

Note: ANALIZA Column C only tracks UoP (employment contract) costs. B2B contractors invoice separately and are NOT included in these figures. The dramatic drop reflects a structural shift, not therapist salary cuts.

428K
2023 EMPLOYEE COSTS
UoP contracts

179K
2024 EMPLOYEE COSTS
-58% YoY

218K
2025 EMPLOYEE COSTS
+22% vs 2024

THE UOP → B2B TRANSITION

Early 2025	428,000 PLN
Mid 2025	179,000 PLN
Late 2025	218,000 PLN

💡 Structural Shift Analysis

The dramatic drop from 428K (2023) to 179K (2024) reflects a strategic shift from UoP (employment contracts) to B2B (contractor) arrangements.

Financial Impact: ~200K+ PLN annual savings in direct employer costs

Why the savings: Elimination of employer-side ZUS (approx. 20% of gross), paid leave obligations, severance requirements, and sick pay.

Important: B2B contractors set their own rates — this doesn't mean therapists earn less. The savings come from structural efficiency, not salary reduction.

EMPLOYMENT MODEL COMPARISON

ASPECT	UOP (EMPLOYMENT CONTRACT)	B2B (MANDATE CONTRACT)
Employer ZUS Cost	**~20% of gross**	**0% (contractor pays)**
Paid Leave	Required (20-26 days)	**Not required**
Sick Pay	Employer liability	**Not covered**
Severance	Required by law	**Not applicable**
Flexibility	**Regulated**	**High**
Therapist Net	After tax ~70%	~85% after costs

SECTION 04

Tax & Insurance (Column E)

ZUS, PIT-4R, PIT-36L composition · Why "Przychody" is misleading

> ⚠️ **Remember:** ANALIZA Column E is labeled "Przychody" but contains primarily tax and insurance obligations. This is the most commonly misunderstood data point in WCP financial analysis.

501,350

2025 ZUS (PLN)

20.8% of true revenue

267,735

2025 PIT TOTAL (PLN)

PIT-4R + PIT-36L

769,085

TOTAL TAX OBLIGATIONS

~32% of revenue

2025 TAX & INSURANCE BREAKDOWN

ZUS	501,350 PLN
PIT-4R	152,840 PLN
PIT-36L	114,895 PLN
VAT (8/9M)	46,626 PLN
Insurance	13,250 PLN

2026 Q1 TAX TREND ALERT

CATEGORY	2026 Q1 (PLN)	ANNUALIZED	VS 2025
ZUS	186,575	~746K	+49%
PIT-4R	28,750	~115K	-25%
PIT-36L	64,810	~259K	+126%

2026 Alert: ZUS payments are tracking 49% higher year-over-year. This may reflect: 1) More UoP employees, 2) Higher salary base, 3) Regulatory changes. PIT-36L is also significantly elevated — review with accountant.

ADDITIONAL INCOME LINES (2025)

SOURCE	AMOUNT (PLN)	NOTES
Government Contracts (EU Projects)	115,090	Powiat Iławski, Gmina Elbląg, ECUS TUS
Sponsorships (Foundations/Sports)	16,380	Community partnerships

SECTION 05

Cost Ratios & Trends

Operating costs as % of revenue · Trend visualization

25.0%

COST STRUCTURE AS % OF TRUE REVENUE (2025)

Operating Costs	25.0%
ZUS Payments	20.8%
PIT Payments	13.6%
Net Cash	50.6%

PERIOD	INVOICE COSTS	EMPLOYEE COSTS	TOTAL OPERATING	COST/REVENUE
2023 (12 months)	398,782	427,958	826,740	**~41%**
2024 (12 months)	327,695	178,878	506,573	**~25%**
2025 (12 months)	329,244	217,648	546,892	**~23%**
2026 Q1 (3 months)	143,444	56,682	200,126	**~30%**

> **Key Insight:** Operating cost ratio improved dramatically from ~41% (2023) to ~23% (2025). This reflects the UoP→B2B shift and general cost optimization. The business is operating more efficiently while growing revenue.

SECTION 06

Key Findings & Recommendations

Strategic insights from 40 months of cost data

1
UoP → B2B Shift Saved ~200K+ PLN Annually
The structural transition from employment contracts to B2B arrangements eliminated employer-side ZUS obligations and reduced compliance overhead. This is a permanent efficiency gain that compounds yearly.
2
Operating Cost Ratio Improved from 41% to 23%
Despite revenue growth, WCP has become significantly more operationally efficient. Cost control is excellent — maintain current discipline while scaling.
3
2026 ZUS Spike Requires Attention
ZUS payments tracking 49% higher in Q1 2026 vs 2025. Investigate: Is this due to new UoP hires? Regulatory changes? Higher salary base? Budget impact could be 200K+ PLN if sustained.
4

EU Project Income is a Strategic Opportunity

115K PLN from government contracts in 2025 shows WCP can access public funding. Pursue systematically — this diversifies revenue and builds institutional relationships.

5

Software Costs Rising — Monitor ROI

Software/subscription costs grew from 42K (2023) to 56K (2025). As WCP scales tools (Booknetic, analytics, marketing platforms), ensure each has measurable ROI.

RECOMMENDATIONS

🎯 **Immediate Actions**

- Review 2026 ZUS spike with accountant — understand drivers and budget impact
- Audit software subscriptions — cancel unused, optimize used
- Document B2B contractor management process for compliance

📈 **Strategic Opportunities**

- Systematically pursue EU/local government contracts — 100K+ revenue potential
- Negotiate volume discounts with recurring vendors (marketing, software)
- Consider shared service center for admin to further optimize costs at scale

SECTION 07

Data Sources & Methodology

Source files · Analysis approach · Limitations

PRIMARY SOURCE FILES

FILE	PERIOD	RECORDS
ANALIZA 2023.xlsx	Jan 2023 – Dec 2023	~3,200

ANALIZA 2024.xlsx	Jan 2024 – Dec 2024	~3,800
ANALIZA 2025.xlsx	Jan 2025 – Dec 2025	~4,100
ANALIZA 2026.xlsx	Jan 2026 – Apr 2026	~2,700

METHODOLOGY

DATA SOURCE	WHAT IT SHOWS	USE FOR
Bank Statements	True cash-in revenue, cash-out patterns	**Revenue, cash flow, growth trends**
ANALIZA Column B+C	Operating costs breakdown	**Cost optimization, budgeting**
ANALIZA Column D+E	Tax/regulatory obligations	**Tax planning, compliance**
ANALIZA "ZAPISY" sheets	Patient signups by channel	**Marketing ROI, acquisition**

> **Data Quality Note:** All figures are derived from official WCP accounting records. Cost figures from ANALIZA are reliable. Revenue figures must be cross-referenced with bank statements, not ANALIZA Column E.

LIMITATIONS

- B2B contractor payments are NOT included in ANALIZA employee costs — true labor cost is higher
- Some cost categorization may shift between years (accounting method changes)
- 2026 data is partial (Q1 + April) — annual projections subject to change
- ANALIZA Column E labeling as "Przychody" is misleading and has caused historical analysis errors
