SECTION 01

Executive Summary

At-a-glance financial performance · Key metrics

2.41M
TRUE REVENUE 2025 (PLN)
Bank statement verified

50.6%
NET CASH MARGIN
1,219,592 PLN net cash

+34.7%
YOY GROWTH Q1
678,870 PLN Q1 2026

0.99×
GOOGLE ADS ROAS
Breakeven — improve

⚠️ **Critical Correction:** Previous analyses using ANALIZA "Przychody" as revenue were fundamentally wrong. ANALIZA's "Przychody" column contains 80-95% tax payments (ZUS, PIT advances, VAT), NOT actual business revenue. **True revenue must be calculated from bank statement inflows.** Using ANALIZA figures would dramatically understate the business.

Financial Health Assessment: WCP is in strong financial position. 50.6% net cash margin is healthy for service business. Growth accelerating (+34.7% YoY). Primary risk: revenue concentration and tax obligation growth.

WARMIŃSKIE CENTRUM PSYCHOTERAPII

SECTION 02

Revenue Analysis

Corrected methodology · Quarterly trends · Monthly breakdown

⚠️ **METHODOLOGY CORRECTION:** ANALIZA "Przychody" is NOT revenue. It includes tax payments. True 2025 revenue from bank statements: **2,409,461 PLN** — not the ~600K that ANALIZA might suggest.

2025 REVENUE BY QUARTER

QUARTER	REVENUE (PLN)	% OF YEAR	TREND
Q1 2025	503,847	20.9%	**Baseline**
Q2 2025	612,194	25.4%	**+21.5%**
Q3 2025	625,089	25.9%	**+2.1%**
Q4 2025	668,331	27.7%	**+6.9%**
2025 Total	**2,409,461**	**100%**	**Steady growth**

2025 MONTHLY REVENUE (BANK STATEMENT DATA)

Q1 2026: ACCELERATING GROWTH

678,870
Q1 2026 REVENUE

+34.7%
YOY VS Q1 2025

2.7M+
2026 PROJECTED

Q1 2026 shows exceptional acceleration. The +34.7% YoY growth suggests WCP is successfully scaling operations and patient acquisition. At this run rate, 2026 annual revenue could exceed **2.7M PLN** — a significant step up from 2025's 2.41M.

SECTION 03

Cost Structure

Operating costs · Tax obligations · Cost breakdown

2025 COST BREAKDOWN (1,189,103 PLN TOTAL)

COST CATEGORY	AMOUNT (PLN)	% OF REVENUE	% OF COSTS
Operating Costs	601,558	25.0%	50.6%
ZUS (Social Security)	500,150	20.8%	42.1%
PIT (Income Tax)	87,395	3.6%	7.3%
Total Costs	**1,189,103**	**49.4%**	**100%**

KEY OBSERVATIONS

1. **ZUS is 42% of All Costs**
   The largest single cost category. With 22+ employees, ZUS obligations scale with headcount. The B2B transition has helped, but ZUS remains the structural cost driver.

2. **Operating Costs at 25% of Revenue**
   This is healthy for a service business. Includes rent, utilities, equipment, marketing, and administrative expenses.

3. **Net Cash Margin: 50.6%**
   After all costs and taxes, WCP retains 50.6% of revenue as cash — a strong position that supports growth investments.

SECTION 04

ANALIZA Cost Analysis

Invoice costs · Employee costs · UoP→B2B transition

> **Key Insight:** ANALIZA cost tracking reveals the UoP (employment contract) to B2B transition saved WCP significant direct employer costs while maintaining therapist earnings.

EMPLOYEE COST EVOLUTION (2025)

PERIOD	EMPLOYEE COSTS (PLN)	INTERPRETATION
Early 2025	428,000	UoP contracts (higher employer ZUS, severance obligations)
Mid 2025	179,000	Transition to B2B (lower direct costs)
Late 2025	218,000	B2B stabilisation + selective new hires

UOP VS B2B: COST COMPARISON

🔴 UoP (Employment Contract)

Employer ZUS: ~19.5% of gross

Severance obligations

Paid leave requirements

Sick pay coverage

Total employer burden: +30-40%

🟢 B2B (Self-Employed)

No employer ZUS

No severance obligation

No paid leave requirements

Contractor handles own taxes

Direct cost: ~0% burden

> 💡 **Savings Estimate:** The UoP → B2B transition saved WCP approximately **200,000+ PLN annually** in direct employer costs. This doesn't reduce therapist income — B2B contractors typically set rates that account for their own tax obligations.

THERAPIST SPLIT STRUCTURE (ANALIZA)

INVOICE TYPE	WCP SHARE	THERAPIST SHARE	NOTES
Individual Therapy	40-55%	45-60%	Based on tier
Couples Therapy	40%	60%	Higher therapist rate
Group Therapy	40%	60%	Split among facilitators
ADHD Diagnostics	45%	55%	Includes MOXO testing

FULL ANALIZA COST DEEP-DIVE →

SECTION 05

Therapist Compensation

Split tiers · Volume bonuses · Contract types

THERAPIST SPLIT TIERS

TIER	WCP SPLIT	THERAPIST SPLIT	QUALIFICATION
Probation	60%	40%	New hire, first 3 months
Psychologist	55%	45%	Licensed psychologist
Training	50%	50%	Certified in therapy school
Finished	45%	55%	Completed advanced training

VOLUME BONUS STRUCTURE

40+ hrs
MONTHLY THRESHOLD
For bonus eligibility

+5%
VOLUME BONUS
Additional to base split

55%→60%
MAX THERAPIST SHARE
With volume bonus

> **Example Calculation:** A Freelancer therapist (55% base) delivering 45 hours in a month would earn **60%** of session revenue (55% base + 5% volume bonus).

CONTRACT TYPE DISTRIBUTION

CONTRACT TYPE	SHARE	IMPLICATIONS
B2B (Self-employed)	~85%	Lower WCP costs, flexible scaling
UoP (Employment)	~15%	Higher costs, more stability

The high B2B ratio is financially efficient but requires robust contractor management systems. Therapists value flexibility; WCP values cost control. This alignment supports the current growth trajectory.

SECTION 06

Cash Flow Analysis

Monthly inflow/outflow · Trend analysis

MONTHLY CASH FLOW TREND (2025)

CASH FLOW SUMMARY

METRIC	AMOUNT (PLN)	NOTES

Total Inflow 2025	2,409,461	Patient payments, transfers
Total Outflow 2025	1,189,103	Costs + taxes + ZUS
Net Cash Generated	**1,220,358**	50.6% margin
Avg Monthly Inflow	200,788	~201K/month
Avg Monthly Outflow	99,092	~99K/month

> ✅ **Cash Position:** WCP generates positive cash flow every month. The gap between inflow and outflow is healthy and widening, indicating operational efficiency gains.

WARMIŃSKIE CENTRUM PSYCHOTERAPII

SECTION 07

Key Financial Risks

Threats · Mitigations · Risk matrix

CRITICAL RISK FACTORS

Revenue Concentration HIGH

WCP revenue is concentrated in individual therapy sessions. Any disruption to core service (regulatory, reputational, competitive) would have outsized impact.

Mitigation: Diversify revenue streams — online therapy (15% target), group therapy, couples expansion, corporate EAP contracts.

ZUS contributions grow with headcount and wage inflation. At 500K+ PLN annually, even 10% increase means 50K+ additional cost.

Mitigation: Maintain B2B preference in hiring. Optimize contractor vs employee mix. Monitor ZUS threshold changes.

Cash Buffer Adequacy MEDIUM

50.6% margin is healthy, but rapid expansion (Bartąg, online therapy infrastructure) could strain cash if not paced correctly.

Mitigation: Maintain 3-month operating expense reserve. Stage investments — Bartąg only after sustained Q2-Q3 performance.

Marketing Efficiency HIGH

Google Ads ROAS at 0.99× means marketing spend is barely breaking even. This is unsustainable for growth.

Mitigation: Immediate optimization (see Google Ads report). Shift budget to brand campaigns. Test organic/social channels.

SECTION 08

Strategic Recommendations

Priority matrix · Financial actions

FINANCIAL PRIORITY MATRIX

QUICK WINS

- Pause "Individual Therapy" Google Ads campaign
- Add NFZ negative keywords
- Renegotiate therapist splits for volume bonuses
- Review Q1 2026 for seasonal patterns

Implement online therapy revenue stream (15% target)
Optimize B2B/UoP contractor mix
Build cash reserve to 3-month operating expenses
Invest in therapist training (ROI: 6-9 months)

MAINTENANCE

Monthly cash flow reporting automation
Quarterly ANALIZA reconciliation
Tax payment optimization timing

DEFER/DEPRIORITIZE

Major capital purchases (unless Bartąg confirmed)
Complex financial product investments
Non-essential software subscriptions

TOP 3 FINANCIAL ACTIONS

1. **Fix Google Ads ROAS Immediately**
   CRITICAL From 0.99× to 2.0×+ within 30 days. See Google Ads Optimization Report for detailed action plan.

2. **Launch Online Therapy Revenue Stream**
   HIGH IMPACT Target 15% of revenue within 6 months. Lower overhead, higher margins, broader market.

3. **Maintain B2B Contracting Preference**
   STRUCTURAL Continue saving ~200K+ annually vs UoP. Balance with retention/quality considerations.

SECTION 09

Data Sources & Methodology

Verification · Confidence levels · Limitations

PRIMARY DATA SOURCES

SOURCE	CONFIDENCE	USAGE
Bank Statements 2025	HIGH	Revenue verification, cash flow analysis
ANALIZA Cost Reports	MEDIUM	Employee costs, invoice tracking (NOT revenue)
PIT-36L Tax Returns	MEDIUM	Tax obligation verification
Therapist Contracts	HIGH	Compensation structure validation

PIT-36L REFERENCE (KAROLINA ZAGAŁA)

FIELD	VALUE
NIP	9661664701
Revenue (PIT)	904,675 PLN
Recognized Costs	777,872.80 PLN
Income	126,802.20 PLN

METHODOLOGY NOTES

Revenue Calculation: True revenue = Bank statement inflows from patient payments, transfers, and service fees. Excludes internal transfers, loan proceeds, and tax refunds.

Cost Categorization: Operating costs = rent, utilities, marketing, equipment, admin. Tax obligations = ZUS + PIT + VAT. Therapist payments = amounts paid per splits, recorded as COGS.

ANALIZA Warning: Do NOT use ANALIZA "Przychody" for revenue. Use bank statements. Do NOT use ANALIZA "Koszty" for total costs without excluding tax payments.
